

ACF, Inc.
Serving Florida

We know how important safety and reliability are to your company.
At ACF, we have invested in a comprehensive plan so you can
be confident we will be there when you need us most.

**SAFETY &
CONFIDENCE**

SAFETY FIRST

- Our full-time Safety Coordinator ensures that all ACF technicians are following proper protocol in order to guarantee everyone's safety
- All ACF technicians are NFPA 70 certified with safety equipment
- All ACF employees are required to complete extensive safety training program
- CPR and First Aid certification available for all ACF employees
- AED defibrillator kits in all of our branches

EMERGENCY PLAN

- ACF Inc. has a 100-point plan for emergency preparedness before, during, and after the event
- We are equipped with backup generators
- During an emergency, we have a contingency plan to move all operations to another location to serve our customers
- Once an area is declared safe, satellite phone service is provided to our technicians to communicate with operations

CLOUD-BASED STORAGE & DATA ENCRYPTION

- ACF Inc.'s business system is secured by Google cloud and maintains the highest level of firewall security to ensure safety from hackers
- All database backups have a 2nd level of 256bit AES encryption applied
- Full disk snapshots of all data across all servers are generated each night and stored on geo-redundant cloud storage, ensuring that we never lose our data
- Google's security team is constantly working to ensure that every level of the infrastructure they provide is secure to new and emerging threats
